DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 14-20, and 22-23 are rejected under 35 U.S.C. 102(b) as being anticipated by Yamashita et al. (U.S. Patent No. 5,139,254), as in the paper of July 14, 2004.

In regard to the added limitation of claim 14 that the control step makes lower an amount of sheets stacked in the first mode than an amount of sheets stacked in the second mode, it should be noted that it was in the previous office action that when the apparatus is operated in a normal fashion to feed large sheets in a first mode and small sheets in a second mode, the control means would automatically make lower the stacking capacity of the stacking unit when the apparatus is switched from the first to the second mode.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 14-23 are rejected under 35 U.S.C. 103(a) as being unpatentable over Yamashita et al., as in the paper of July 14, 2004.

Response to Arguments

5. Applicant's arguments filed October 6, 2004 have been fully considered but they are not persuasive.

The applicant asserts that making of the amount of sheets stacked in different modes would not be an inherent feature of Yamashita, et al. but does provide any additional reasoning to back up the assertion and thus the argument is unpersuasive.

Conclusion

6. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
